## INTRODUCTION

RADEA.IO APP is a track and trace and inventory tool for Android devices used with RADEA.IO. RADEA.IO is Brady's asset tracking and RFID data consolidating platform.

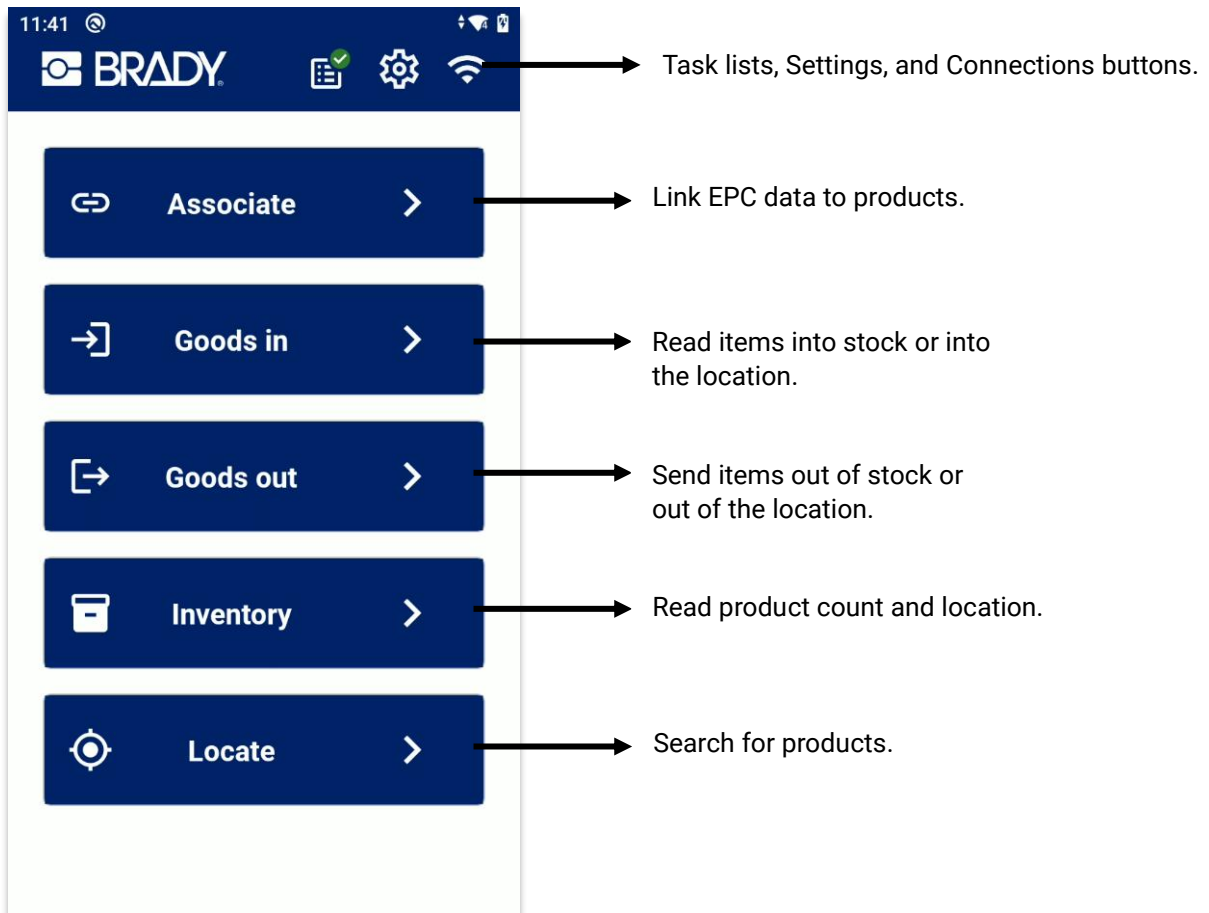

RADEA.IO APP can be installed from the Play Store to your Android device, or from the Brady App Center to your HH83 or HH85 handheld readers.

To get started with RADEA.IO APP:

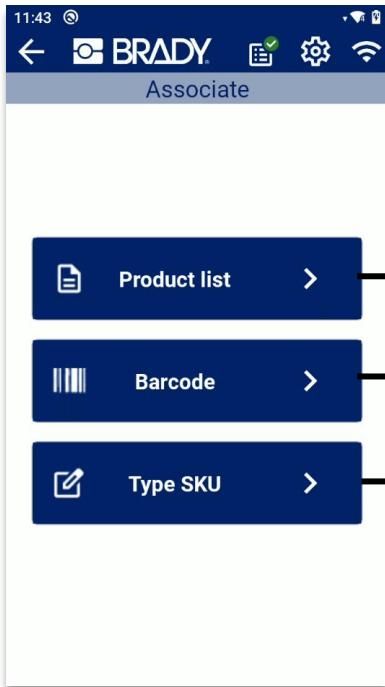

- 1** Add a reader configuration, or multiple configurations and a handheld reader to your RADEA.IO instance. (See instructions here: [Manage devices](#))
- 2** Find the  application, RADEA.IO APP, from Play Store and Install on your mobile device. Open.

## MAIN MENU

## ASSOCIATE

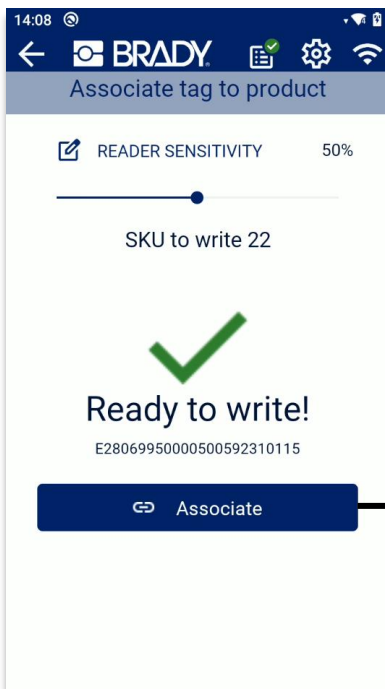

Link EPC data to products using your instance's categories and products defined in RADEA.IO.

Link EPC data to products from barcode.

Link EPC data to products by typing an SKU.

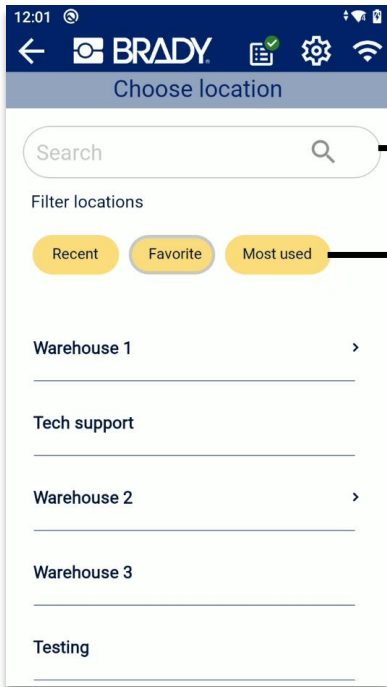

Hold the tag you wish to associate, near the reader antenna.

Adjust the power level. Higher sensitivity means the detection range is longer.

Tap to associate.

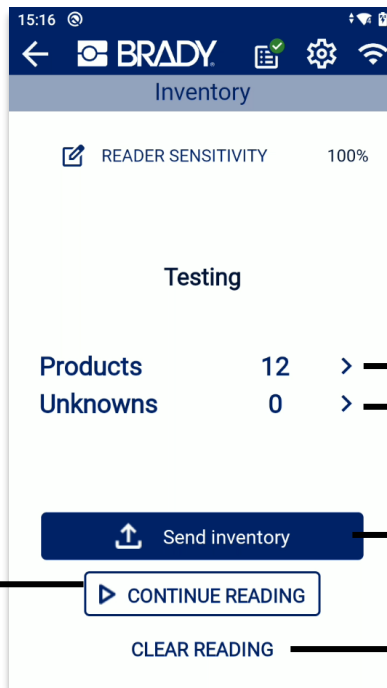

## GOODS IN, GOODS OUT AND INVENTORY

Search locations.

Filter locations with specific criteria. Add favorites by pressing on a location name and then tapping the star that appears.

Location list. Choose the desired location or sublocation.

Adjust the power level.

Check read products. Continue on, to locate nearest or any product, or remove them from the read results.

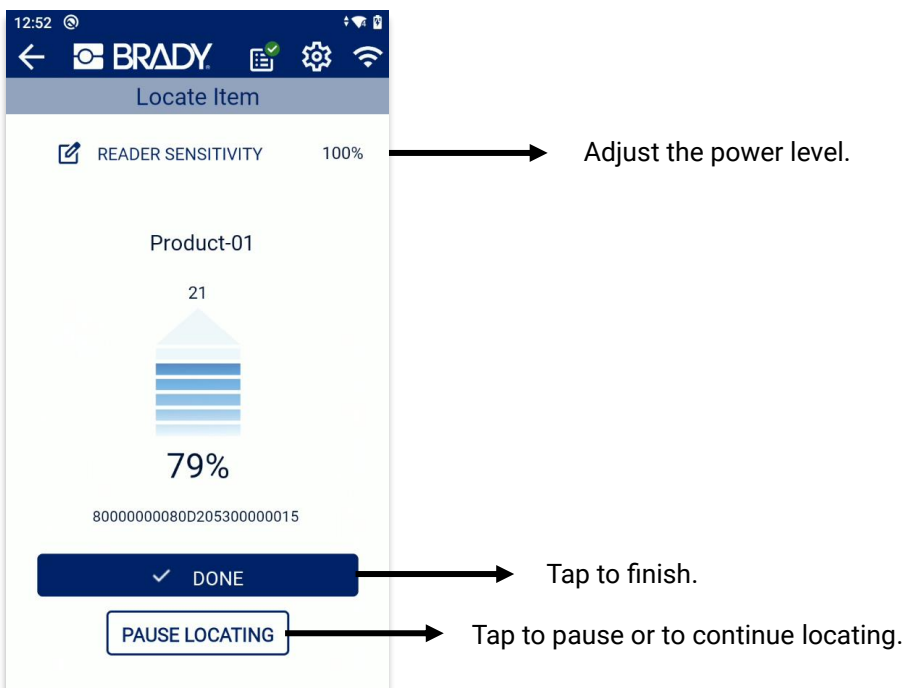

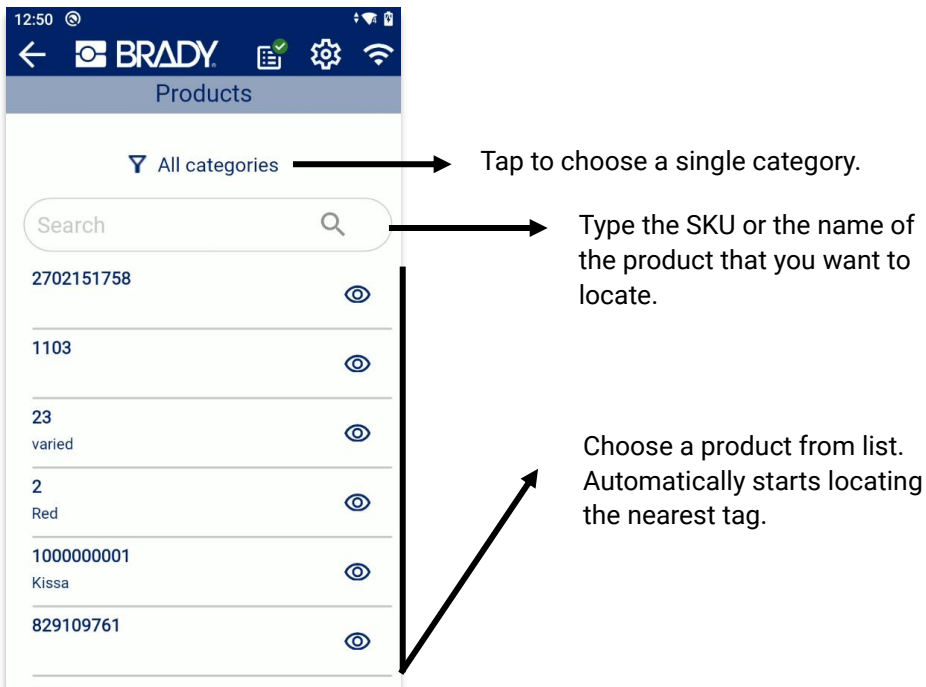

Check found unknown products. Remove from read results.

Tap to send the read result to the RADEA.IO instance, where they will be handled.

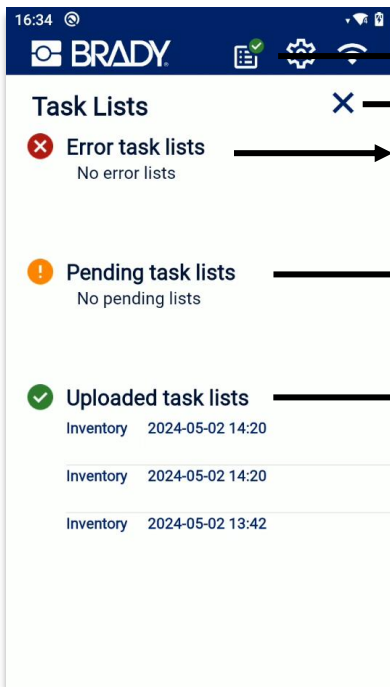

Clear read results.

Tap to pause or continue reading.

## LOCATE

## TASK LISTS

16:34
